turnmotion

A rotating storage system which makes maximum use of dead space within corner cupboards. The magic of turnmotion is that the door forms part of the system. When the door is pushed in it rotates with the carousel 360°, providing easier access.

The system consists of grey mfc shelves with wire galleries. Two finishes are available in the plain styling:

- stainless steel door with chrome wire work inside
- aluminium door with silver wirework inside

In addition to the plain option featured above, turnmotion is also available in aluminium finish with a ribbed texture. This ribbed version is supplied with silver galleries and grey speckle mfc shelves. A ribbed aluminium plinth is also available in 3m lengths to suit the ribbed turnmotion.

Note: the prices below exclude standard carcass.

base turnmotion units

base turnmotion - designed for use in 900mm base unit using 18mm board	price (incl VAT)
